Lumière

Complete Functionality Inventory

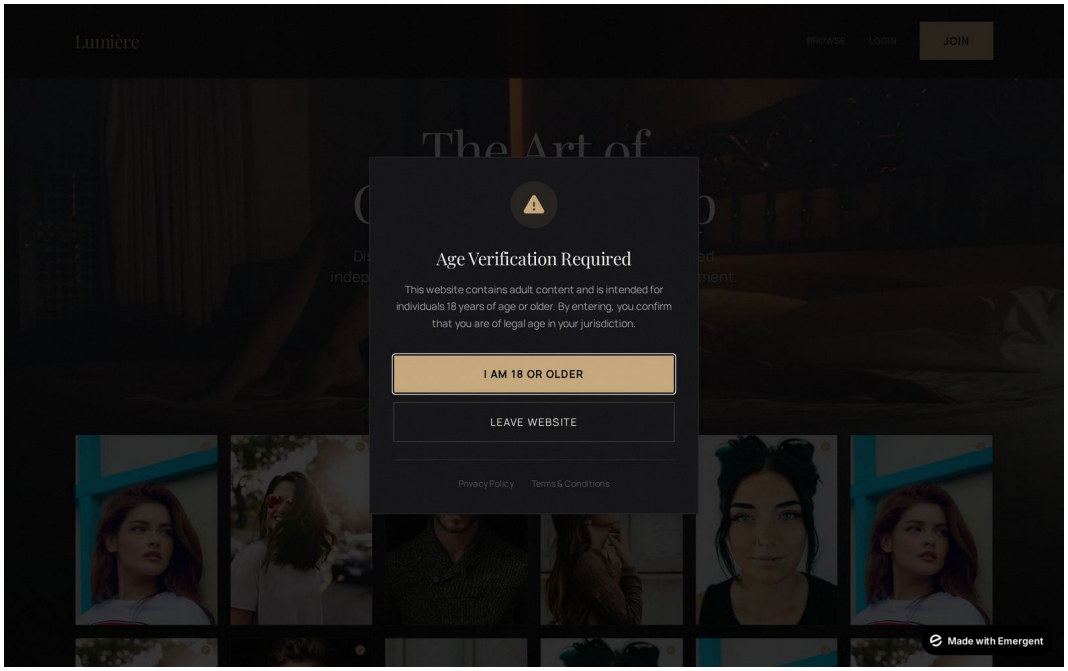

Landing — desktop view

1. Public (no login required)

Landing page (/)

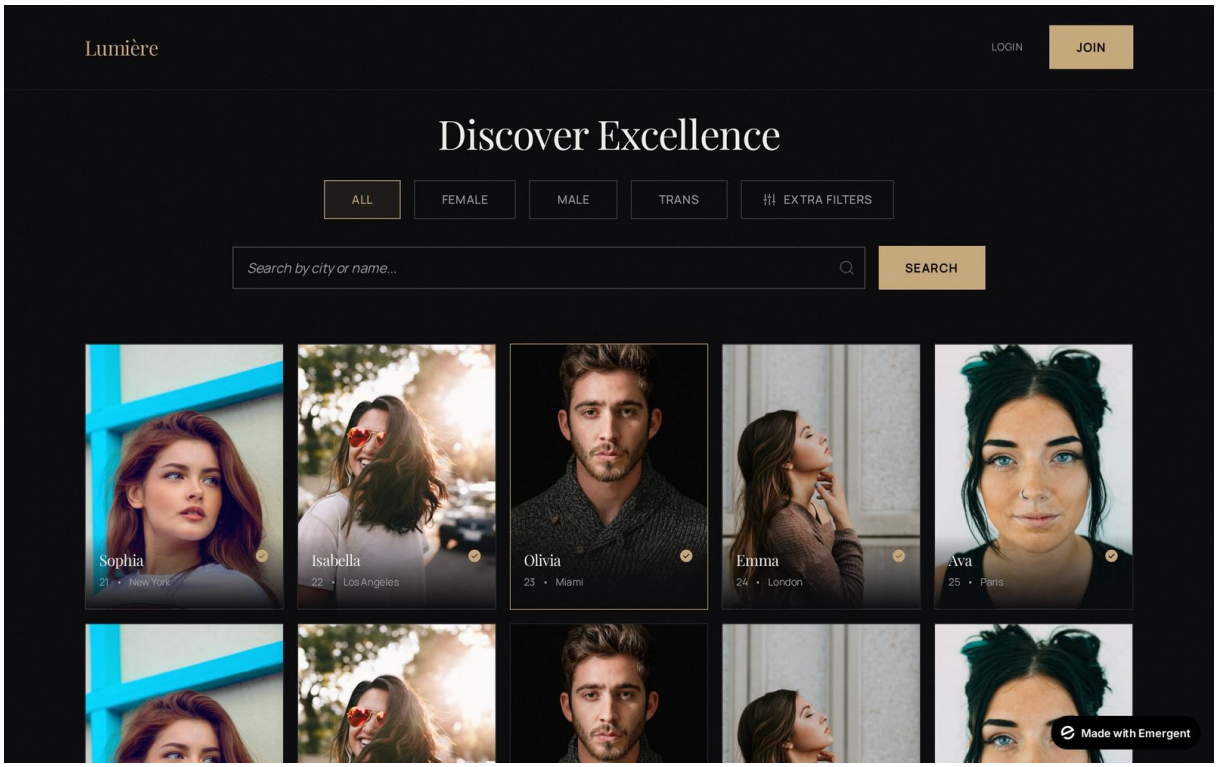

- Cinematic hero with custom background image (responsive WebP/JPG)
- 18+ age-verification modal (gated entry)
- Latest 18 profiles preview overlapping the hero
- "Why choose us" section (Trust / Privacy / Discretion)
- Mobile hamburger nav and bottom-friendly footer

Age verification modal — gates entry to the site

Browse page (/browse)

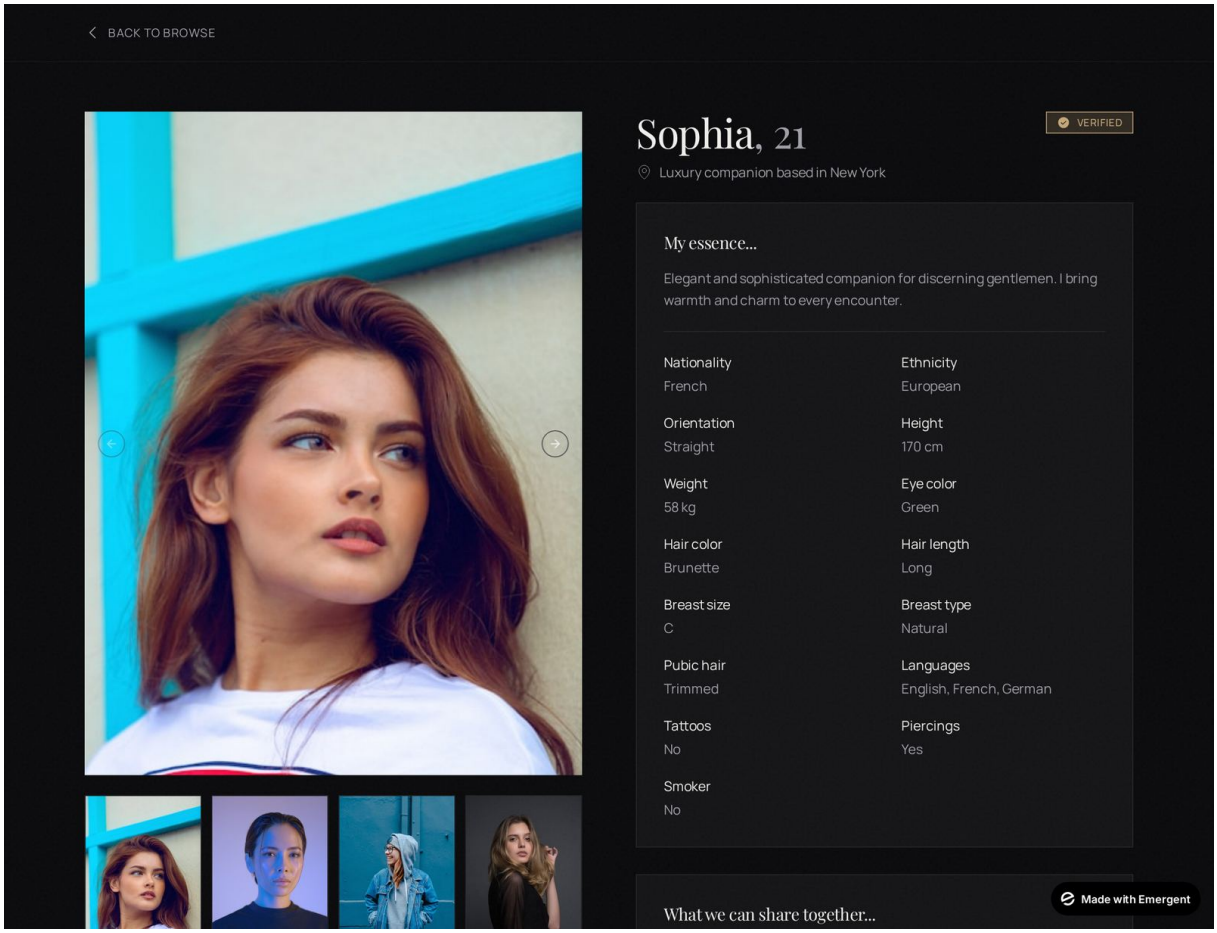

- Provider grid with photo, name, age, location, verified badge
- Gender filter chips: All / Female / Male / Trans
- Free-text search (city or name)
- Extra Filters drawer (rate range, services)
- Offline fallback shows recently viewed providers when offline
- Mobile-responsive (filters wrap, hamburger)

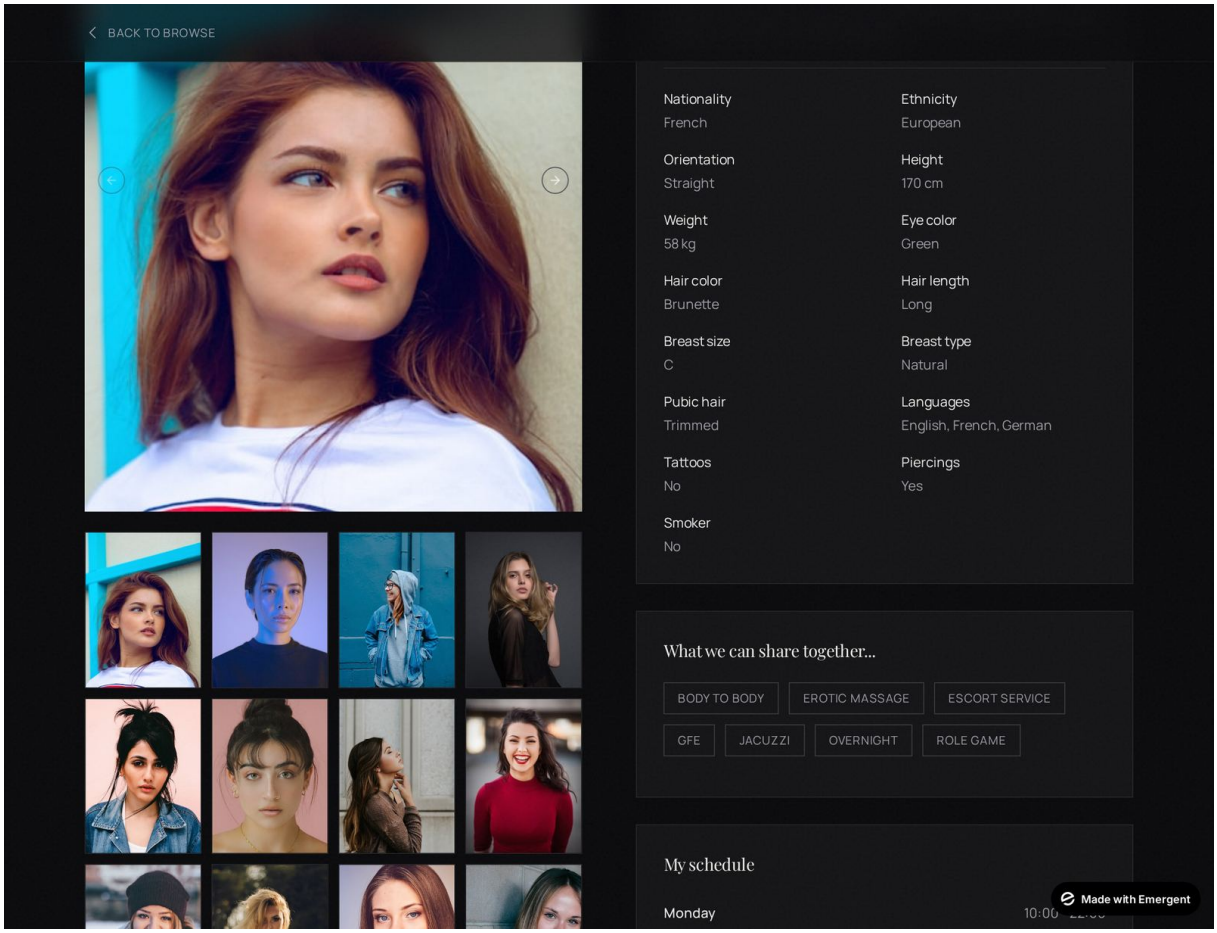

Browse — desktop

Provider Detail page (/providers/:id)

- Hero photo carousel + thumbnail grid
- Name, age, verified badge, city
- My Essence card with bio + 15 physical characteristics in 2-column stacked layout
- What we can share together — services grouped by Inclusive / Extra (with prices)
- My Schedule — 7-day availability grid
- Let's Connect block — direct contact: Phone / WhatsApp / Telegram / Email
- Extra Requests inline form
- Auto-tracks recent views to localStorage for offline browsing

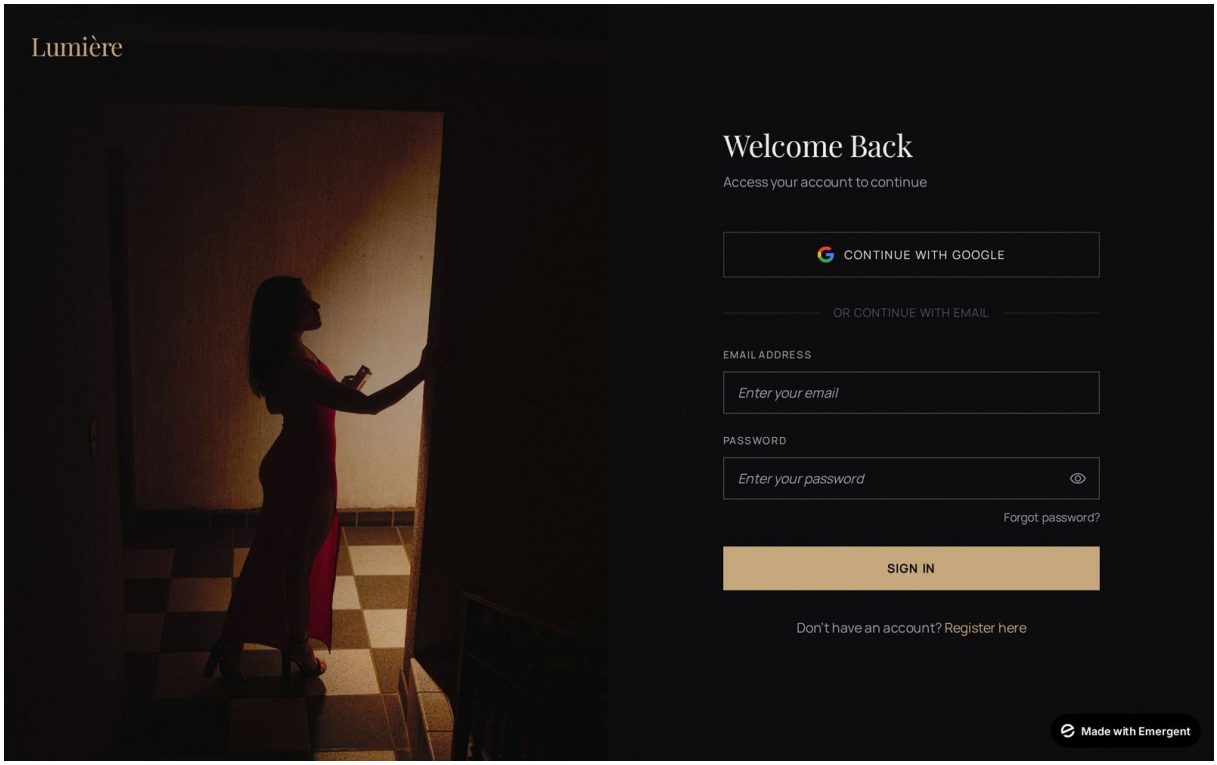

Provider Detail — hero + carousel

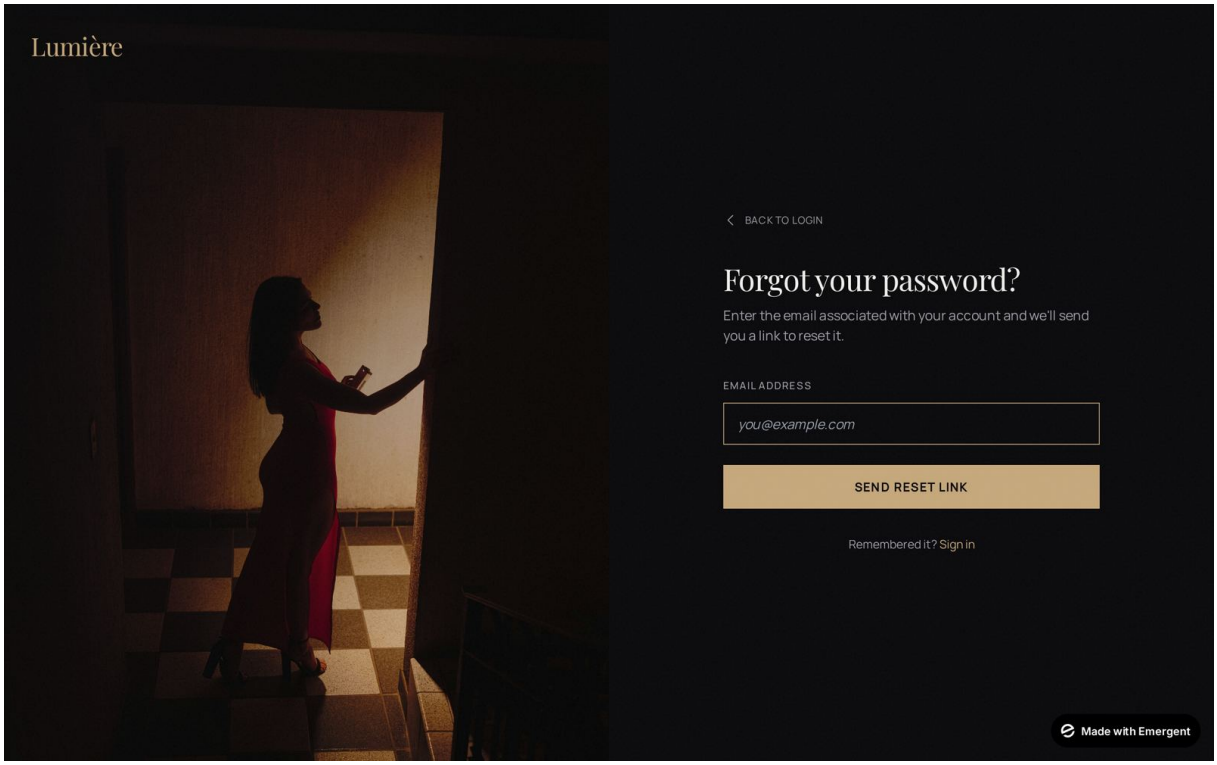

My Essence with physical characteristics in two columns

Auth pages

- /login — Google CTA + email/password + Forgot password link
- /register — role toggle (Client / Provider) + Google CTA + email/password
- /forgot-password — email submit → "Check your email" success state
- /reset-password?token=... — new + confirm password with show/hide, validates token expiry & single-use

Login — split layout with brand image

Forgot password — discreet, neutral messaging

2. Client experience

Client Dashboard (/dashboard)

- Welcome header with user name
- 2 quick-action cards: Discover (browse) + Messages (inbox)

Messaging (/messages)

- Threaded conversation inbox per provider
- Unread badges
- Send/receive messages
- Conversation triggered from provider profile via Connect CTA

3. Provider experience

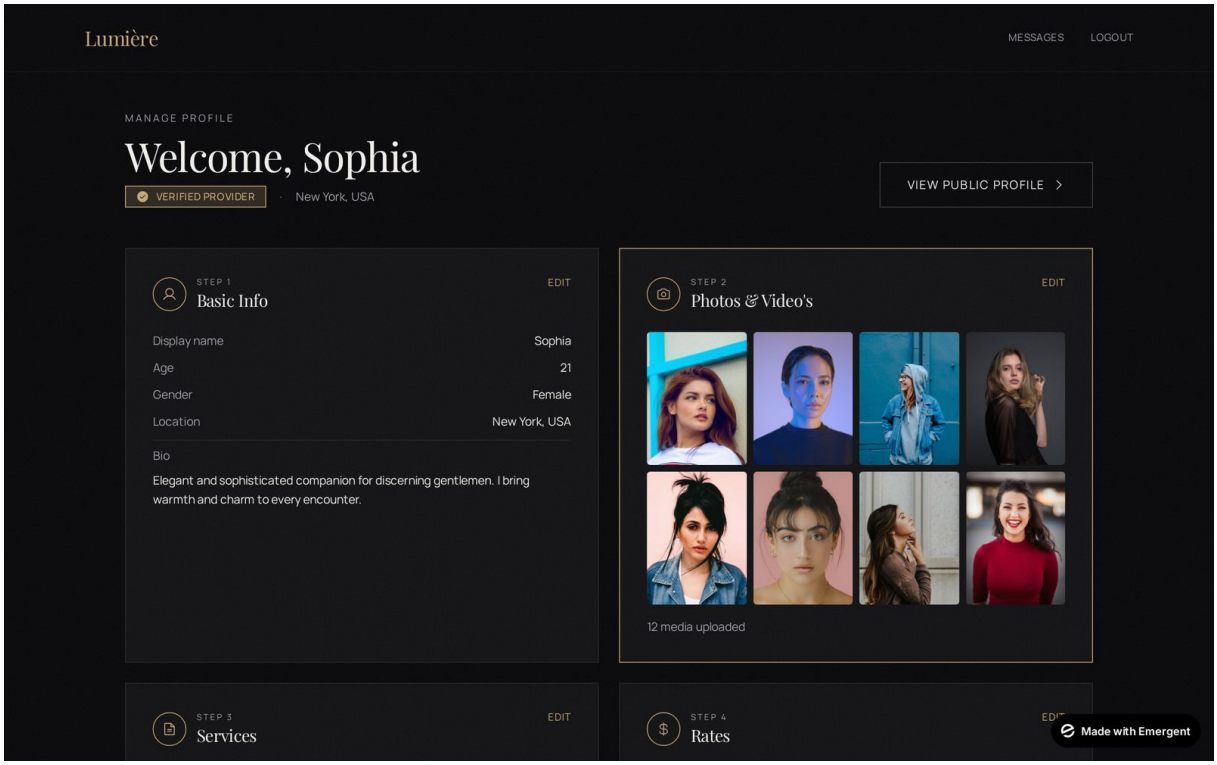

Provider Dashboard (/dashboard) has two modes that auto-toggle based on profile state.

Create mode (no profile yet) — 5-step wizard

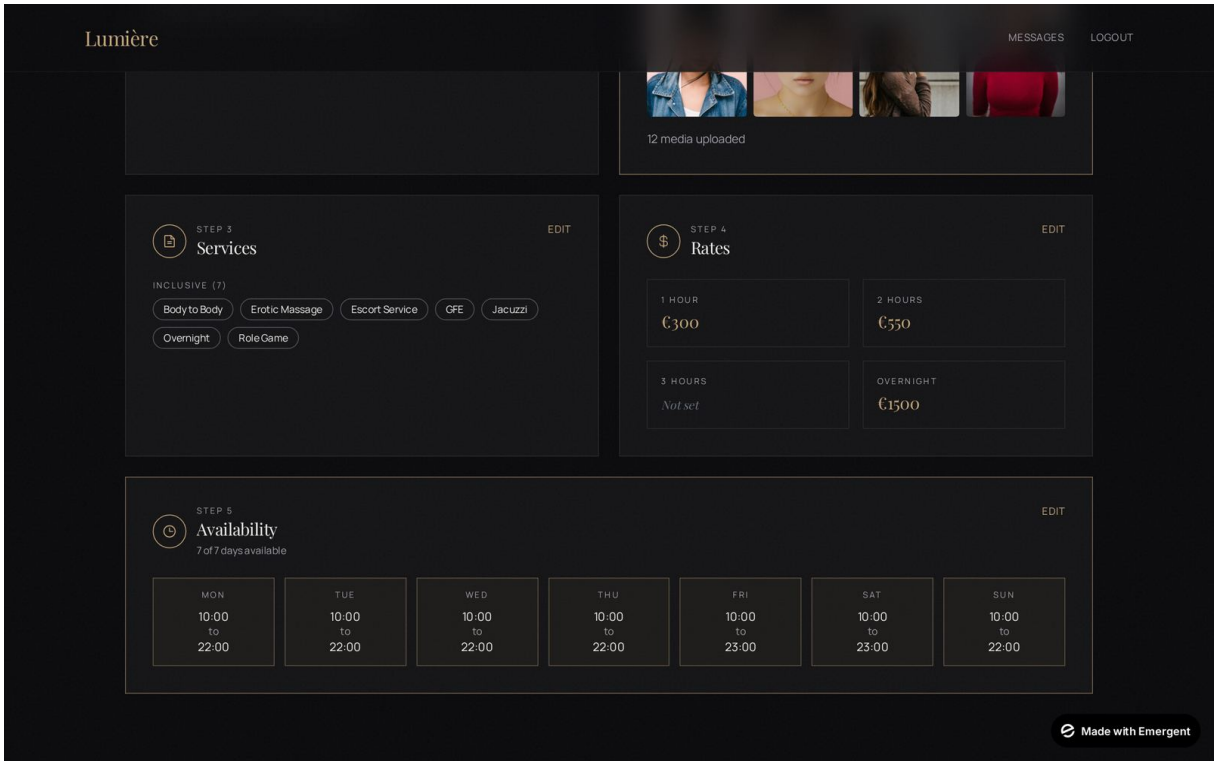

- Step 1 — Basic Info: name, age, gender, city/country, contact, bio, 15 physical characteristics
- Step 2 — Photos & Videos: drag-drop upload, thumbnail preview with remove, base64 storage
- Step 3 — Services: Inclusive / Extra toggles, custom-add service, companionship-type adapter
- Step 4 — Rates: 1h / 2h / 3h / overnight (€), clean number inputs
- Step 5 — Availability: per-day schedule, 24/7 toggle, closed days

Manage mode (profile exists)

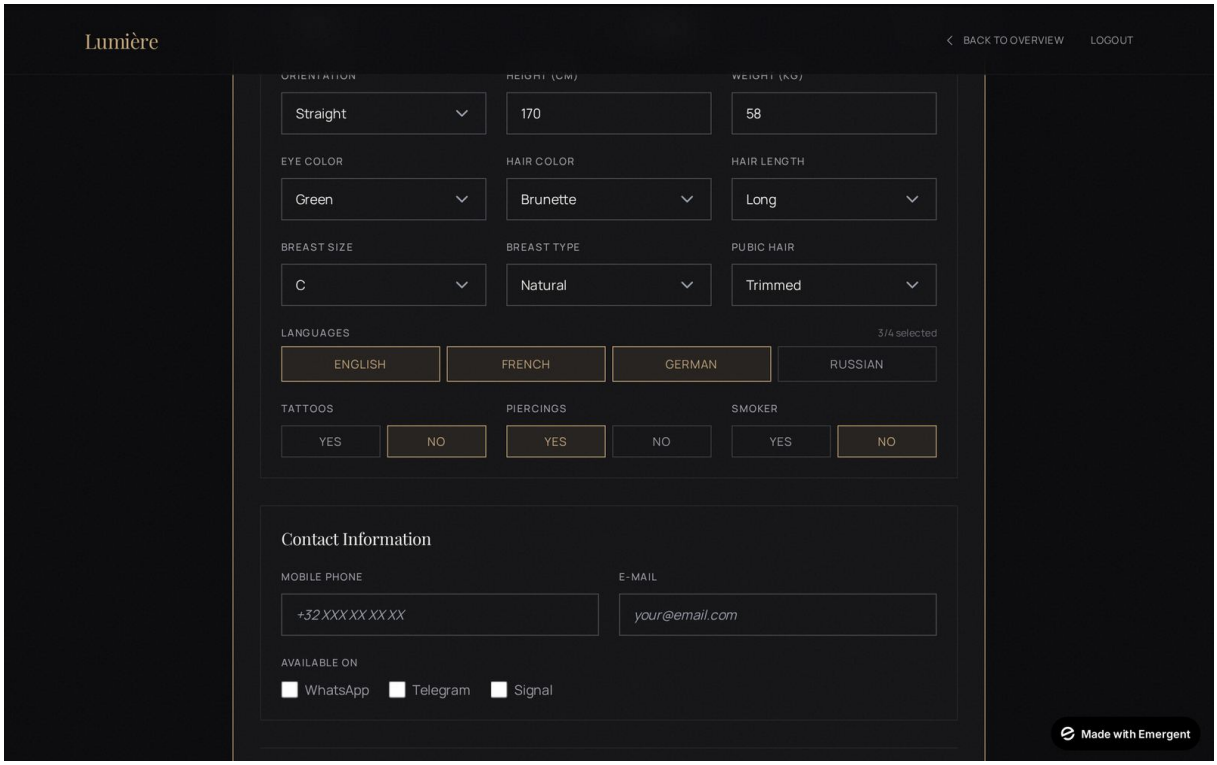

- Welcome header with verified badge + View Public Profile CTA
- 5 management cards (one per step) with current data + Edit
- Edit jumps to that step's form, pre-filled, with Cancel / Save Changes

Provider management dashboard — top

Provider management dashboard — Services / Rates / Availability

Edit Basic Info — physical characteristics form

4. Admin experience (/admin)

Admin Dashboard

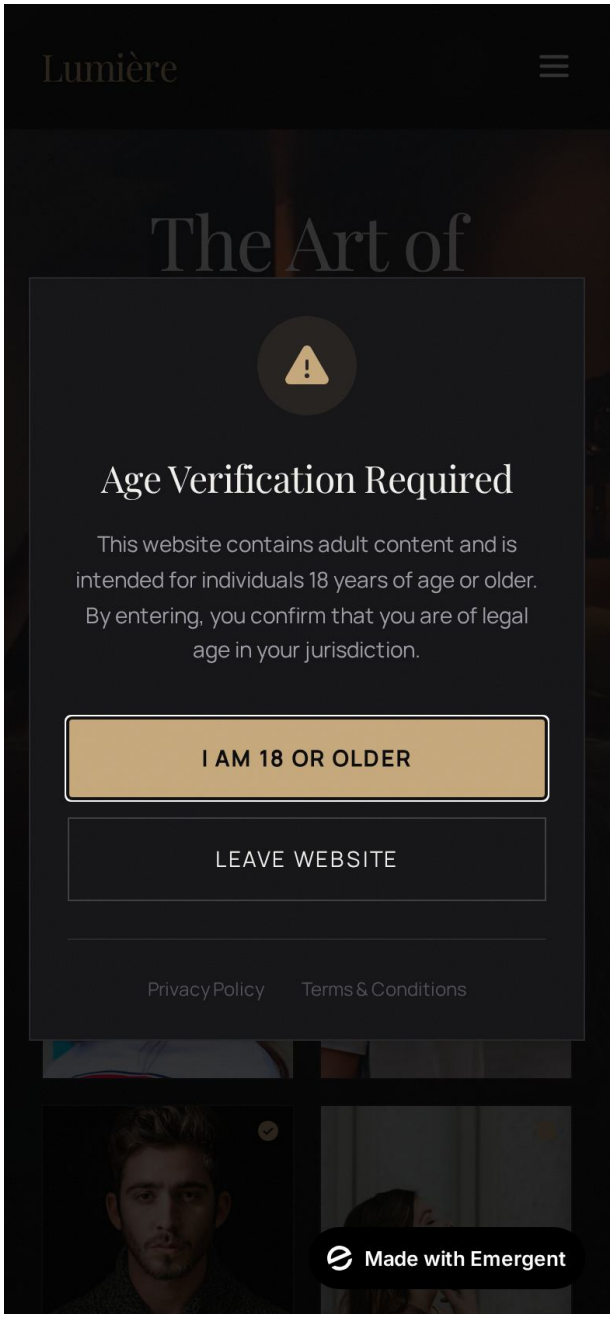

- Stats tiles: Total Providers / Total Clients / Pending Media / Providers Needing Action
- Traffic chart (page views over last N days)
- Provider table with status, verification, photos count, last activity

Admin Provider Detail (/admin/providers/:id)

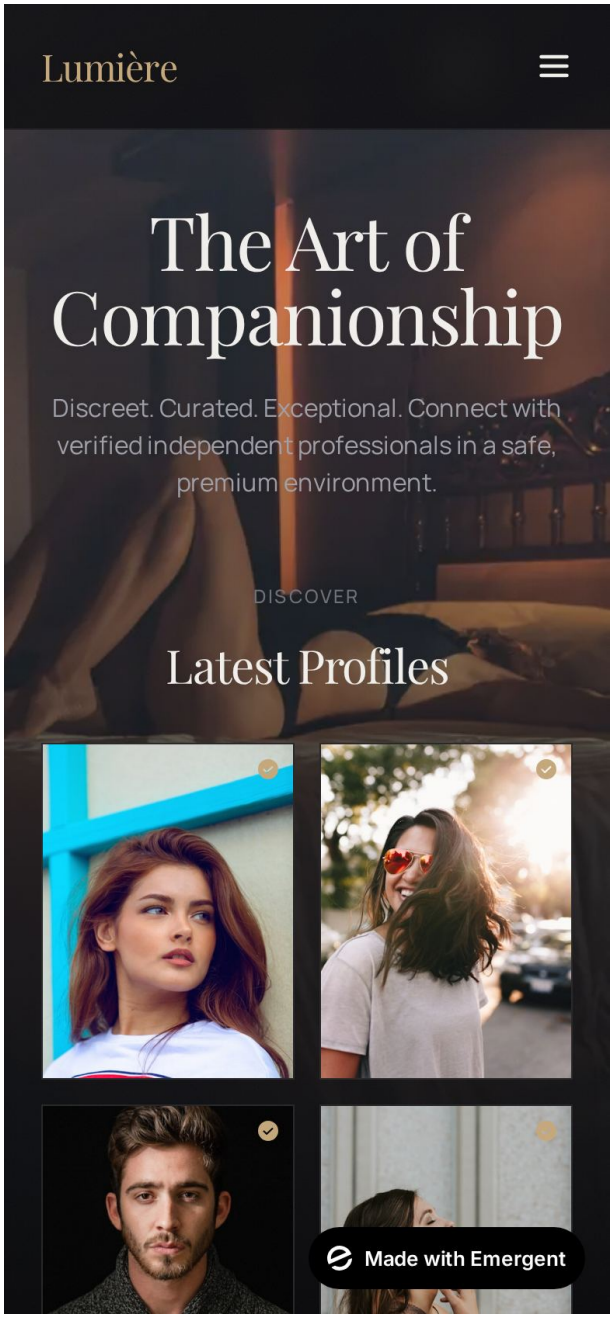

- Full profile view
- Verify / Unverify toggle
- (Pending) media approval per photo/video

5. PWA & Mobile

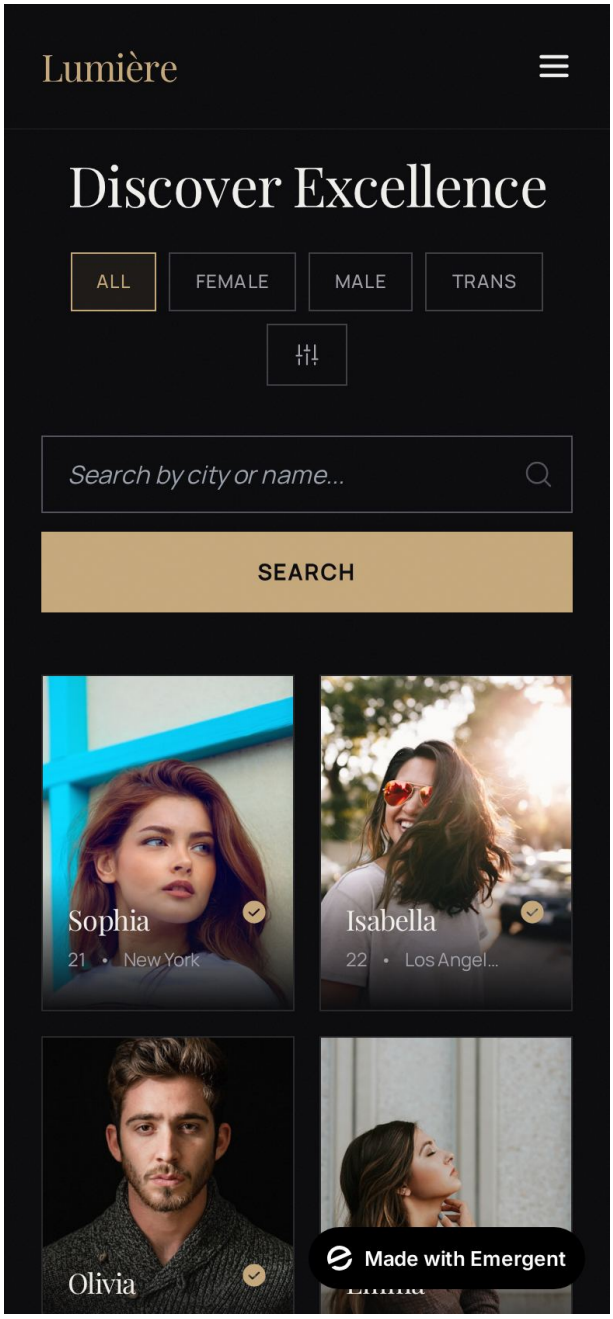

- Installable PWA with manifest.json (gold L monogram icons in 192/512/180 px)
- iOS Safari + Android Chrome Add-to-Home-Screen bottom sheet (auto-shows after 6–8 s)
- iOS-specific meta tags (apple-mobile-web-app-capable, status-bar style, app title)
- Service worker pre-caches the app shell on install
- Static JS / CSS / fonts: cache-first
- HTML navigations: network-first with offline fallback
- Provider API GETs: stale-while-revalidate
- Images: cache-first with runtime caching
- Mobile-responsive everywhere (tested at 390px)

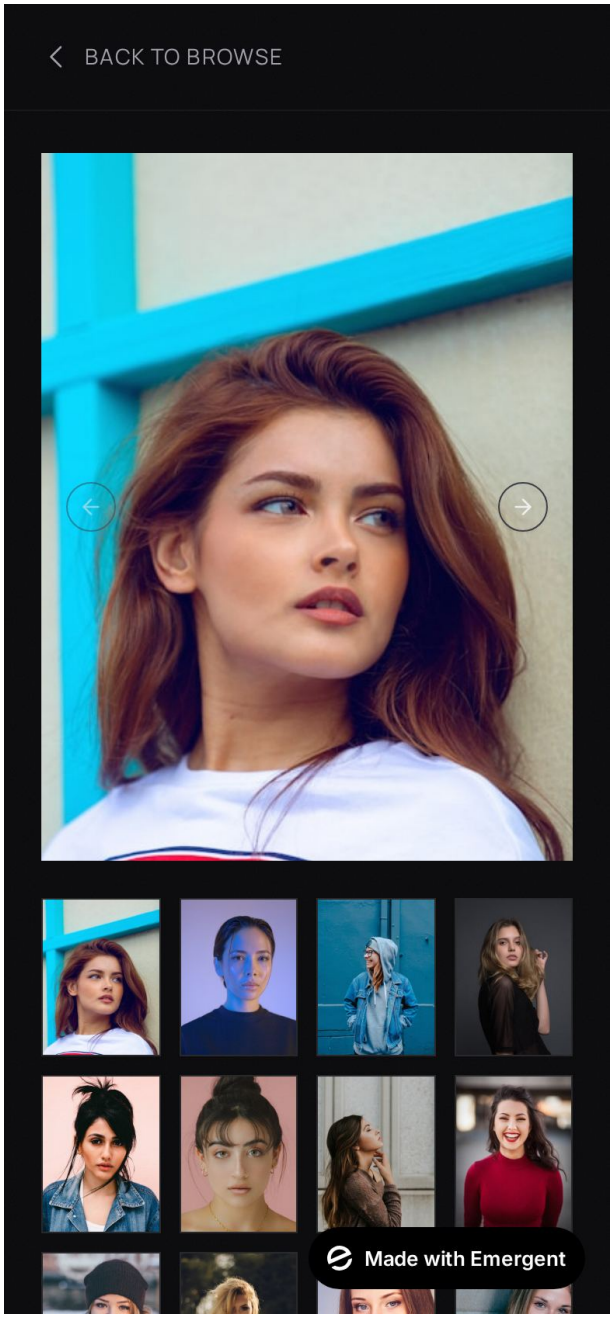

Mobile (390 px) — age modal with safe-area margin

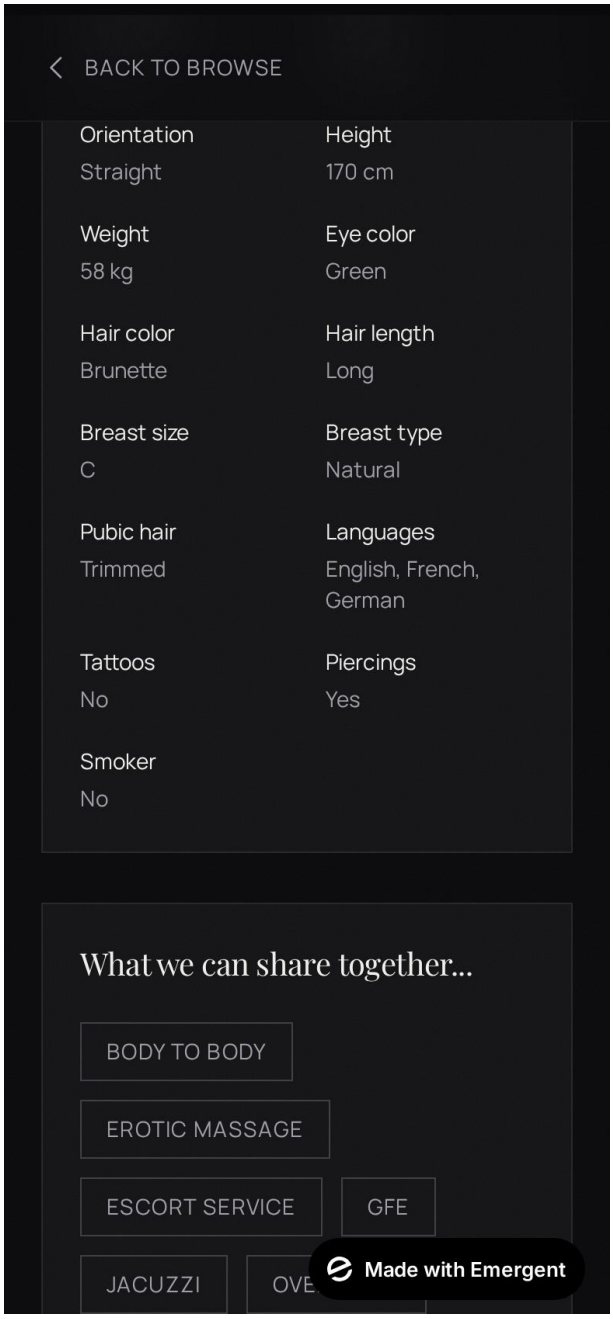

Mobile — landing with hamburger menu

Mobile — Browse, filter chips wrap

Mobile — Provider Detail hero

Mobile — characteristics 2-column layout

6. Auth & Security

- JWT-style session cookies (HttpOnly, Secure, SameSite=none)
- bcrypt password hashing
- Role-based access (client / provider / admin)
- Forgot password via Resend (24 h token expiry, single-use, neutral response)
- Sessions invalidated on password reset

7. Integrations

- Resend — transactional emails (currently password reset; sender = onboarding@resend.dev test mode, only delivers to account owner until custom domain verified)
- Google OAuth — UI-only buttons present; full integration pending

8. Backend API endpoints

```
POST  /api/auth/register
POST  /api/auth/login
POST  /api/auth/logout
POST  /api/auth/forgot-password
POST  /api/auth/reset-password

GET   /api/providers                 (city/service/min_rate/max_rate/gender filters)
GET   /api/providers/:id
POST  /api/providers/profile         (create)
PUT   /api/providers/profile         (update)
GET   /api/providers/dashboard/stats

GET   /api/conversations
GET   /api/conversations/:id/messages
POST  /api/conversations             (create with provider_id)
POST  /api/messages

POST  /api/verification/submit
GET   /api/verification/status

GET   /api/admin/providers
GET   /api/admin/providers/:id
POST  /api/admin/providers/:id/verify
PUT   /api/admin/media/:id/approve
GET   /api/admin/verifications
```

```
PUT   /api/admin/verifications/:id
GET   /api/admin/stats
GET   /api/admin/traffic

POST  /api/track                      (page view tracking)
```

9. Design system

• Palette: #0A0A0C (background), #141416 (cards), #27272A (borders), #C6A87C (gold accent), #F2F0ED (white text), #A1A1AA (grey text)

• Type: Playfair Display (headings), system font (body)

• Components: shadcn/ui base + custom premium classes (btn-primary, btn-ghost, card-premium, input-premium, verified-badge)

10. Known mocks / pending

• Booking system fully removed — clients connect via direct contact + messaging only

• Admin photo/video approval — UI exists, backend wiring pending

• Custom Resend domain — needs verification at resend.com/domains for emails to non-owner inboxes

• Photo storage — currently base64 in MongoDB (works; planned migration to S3/presigned URLs)

Lumière · Discreet. Curated. Exceptional.
