Only Elite Escorts

Brand Guidelines

Tagline: *"Bringing your secret desire closer to you"*

This document describes the visual language of the platform: colours, typography, buttons, form fields, spacing and iconography. Use it as the single source of truth when designing any new surface, marketing collateral, or partner asset.

1. Colour palette

The palette is anchored by rose (primary action), wine (headings & selection), and a light near-white surface. Neutral greys handle borders, labels and secondary text.

Brand primaries

Rose

#DA4167

Primary CTA fill · focus outline · pink accents

Wine

#832161

Section titles · dashboard-light secondary CTA · active selection

Deep Purple

#3D2645

Reserved for headline accents and future dark accents

Neutrals

White

#FFFFFF

Card & light-form backgrounds

Off-white

#F0EFF4

Light page background

Near-black

#0A0A0C

Dark page background (Landing, Login, Register)

Panel dark

#141416

Original dark card surface

Black

#000000

Body text on light pages

Light grey

#dbdadd

Card borders and dividers on light pages

Mid grey

#898989

Field labels · unselected chip text on light pages

Dark grey

#52525B

Input borders on dark pages

Table header grey

#4B4B4B

Services table header background

Placeholder grey

#9CA3AF

Placeholder text inside inputs

2. Typography

The product uses **Playfair Display** for elegant serif display headings (logo, hero title) and **Inter** for all UI copy. Fall back to the system UI stack for print / PDF exports.

Type scale (Tailwind classes)

Token	Class	Usage
H1	text-4xl / sm:text-5xl / lg:text-6xl	Hero, page headline
H2	text-2xl	Section titles inside forms & cards
H3	text-lg / text-xl	Card / block sub-title
Body	text-base (mobile: text-sm)	Standard paragraph copy
Small	text-sm	Field labels, secondary info
Micro	text-xs	Helper text · counters · badges
Tracking	tracking-[0.2em]	Uppercase eyebrows and CTA labels

3. Buttons

The platform uses two button hierarchies: **Primary** (solid rose) and **Secondary** (outline). Secondary buttons adapt to page background — white outline on dark pages, wine outline inside the light Provider Dashboard.

Primary CTA · used everywhere

Fill **#DA4167** · Label **#FFFFFF** · Hover fill **#c33658** · Height 50px · Uppercase, tracking 0.2em

Secondary CTA · dark pages

Fill transparent · Outline **#FFFFFF** · Label **#FFFFFF** · Hover bg **rgba(255,255,255,0.10)**

Secondary CTA · light dashboard (.dashboard-light scope)

Fill transparent · Outline **#832161** · Label **#832161** · Hover bg **rgba(131,33,97,0.10)**

4. Form fields

All forms across the app follow one spacing and colour system, whether they sit on a dark or light surface.

Field colours

Element	Value	Hex
Field outline · default	grey	#898989
Field outline · focus / active	pink	#DA4167
Field label	grey	#898989
Field text (typed value)	black	#000000
Field placeholder	tailwind grey-400	#9CA3AF
Helper / error text	pink	#DA4167
Selection button · unselected	outline+text grey	#898989
Selection button · selected	outline+text wine	#832161
Selection button · hover	outline wine	#832161

Form spacing rules

Pair	Value	Tailwind
Padding between label and field	4 px	mb-1
Padding between helper text and field	4 px	mt-1
Padding between fields	16 px	flex flex-col gap-4

Checkboxes

Every **<input type='checkbox'>** uses a transparent background (inheriting the page/surface behind it) with a matching neutral grey border (**#898989** in the .dashboard-light scope, **#52525B** on dark pages). When checked, the box fills with **#DA4167** and shows a white check mark. Focus adds a soft rose ring (**rgba(218,65,103,0.25)**).

5. Cards & surfaces

Cards use two surface styles, applied automatically via the **.dashboard-light** scope on the Provider Dashboard.

Card · dark page (base)

bg-[#141416] · **border-[#27272A]** · hover border **#832161**

Card · .dashboard-light (light dashboard)

bg-[#FFFFFF] · **border-[#dbdadd]** · hover border **#832161**

6. Iconography

Icons are pulled from **phosphor-react** and Font Awesome CDN. Weights *bold* or *fill* are preferred for CTAs. Do not use emoji glyphs for UI icons.

7. Tone of voice

Premium · discreet · elegant · trustworthy. Copy is concise, in Title Case for CTAs and sentence case for body. Avoid slang; favour the words *elegant, refined, verified, discreet, exclusive*. Tagline for hero placements:

"Bringing your secret desire closer to you"

8. Motion

Prefer 200–300ms cubic-bezier transitions on colour, transform and shadow. Never animate **all** (breaks transforms). Micro-animations to keep: arrow slide on CTA hover, star rotate on advertise CTA, hover-lift on provider cards.
